

JAMIE KLOCK

PHOTOGRAPHY

Jamie Klock is a native of the Illinois Valley, flavored with some Virginia charm and a New York state of mind. Life has taken him in all different directions, giving him an appreciation for the simple beauty that is life.

Reallife-Photography is the avenue he has chosen to show the world how he perceives it. He has always been an artist and is motivated by anything that catches his creative eye. Jamie tends to shoot “outside the box” since he began shooting pictures in his early thirties. He began as a hobbyist, with a small digital throwaway camera and has upgraded along the way. He currently shoots with a Nikon D90, and prefers post editing with Photoshop.

It is the thrill of inspiration, the challenge of creation, and the emotion a photo inspires that keeps his passion for photography alive, dynamic, and ever changing. He believes that the heart of photography lies in those that behold the picture. Jamie remains open to capturing any moment, person, or object that is desired. His work is also on display at www.reallife-photography.com, 365 days a year. Please enjoy responsibly!

From the Heart to the Hand –

A Passion for Creation®
